

Colonorm BCS (B-Fence ointment 2 %)

B-Fence (Mupirocin) is used as a topical treatment for bacterial skin infections, for example, furuncle, impetigo, open wounds, which are typically due to infection by *Staphylococcus aureus* or *Streptococcus pyogenes*. It is also useful in the treatment of superficial methicillin-resistant *Staphylococcus aureus* (MRSA) infections. B-Fence is inactive for most anaerobic bacteria, mycobacteria, mycoplasma, chlamydia, yeast and fungi.

Intranasal Mupirocin before surgery is effective for prevention of post-operative wound infection with *Staphylococcus aureus* and preventative intranasal or catheter-site treatment is effective for reducing the risk of catheter site infection in persons treated with chronic peritoneal dialysis.
